

Max – age 4

Reason for seeking chiropractic care: Upset Stomachs

Since birth, Max has had upset stomachs daily. We tried adjusting what I ate when I was nursing. Milk seemed to aggravate it so we put him on soy. We've taken him off soy because it didn't seem to matter.

He had blood tests done because physician suspected allergies – he even had “shiners”. All tests were negative – he wanted to do more extensive allergy tests. Many days our plans would change due to his upset stomachs.

Since chiropractic care – we don't have to worry about upset stomachs. He sleeps and eats better and no more rushing for a restroom at stores. We're very glad we were introduced to chiropractics.
